DATA SHEET

Hybrid Multiband Beamforming Antenna

8HBF4R-BUH6NA

- Six foot (1.8 m), Hybrid Multiband Beamforming Antenna, deploying a high performing 65° azimuth beamwidth covering 698-896 MHz/1695-2400 MHz frequencies and an 8T8R Beamforming array covering 3300-4200 MHz
- Four wide low band ports covering 698-896 MHz, Four wide mid band ports covering 1695-2400 MHz and Eight wide high band ports covering 3300-4200 MHz, in a single antenna
- Full Spectrum Compliance for 698-896 MHz, 1695-2400 MHz and 3300-4200 MHz
- Provides an 8T8R Beamforming array, with a calibration port, for RRU controlled Azimuth beam control and beamforming, for increased 5G services data throughput and decreased latency, by minimizing interference and increasing signal strength at directed users
- Beamforming array can be deployed with tapering (or without tapering), for improved Azimuth SLL performance
- LTE Optimized FBR, SPR and Boresight/Sector XPD Performance, essential for today's LTE Data Networks
- Exceeds minimum PIM performance requirements
- Equipped with new 4.3-10 connector, which is 40% smaller than traditional 7/16 DIN connector
- Equipped with Three Field Replaceable, integrated AISG 2.0 compliant Remote Electrical Tilt (RET)

Overview

The CCI Hybrid Multiband Array with 3.5 GHz 8T8R Support is a Sixteen port antenna, with Four wide low band ports covering 698-896 MHz, Four wide mid band ports covering 1695-2400 MHz and Eight wide high band ports covering 3300-4200 MHz. The CCI Hybrid Multiband Array with 3.5 GHz 8T8R Support uses a high performance 65° azimuth beamwidth in the low band and mid band frequencies and an 8T8R Beamforming array in the high band frequencies.

The CCI Hybrid Multiband Beamforming Antenna provides the capability to deploy a Single 4x4 Multiple-input Multiple-output in the low band, Single 4x4 Multiple-input Multiple-output (MIMO) in the mid band and 8T8R Beamforming in the high band. The CCI Hybrid Multiband Beamforming Antenna utilizes three Type 17 RET controllers, with one RET for the Low Band ports, one RET for the Mid Band ports and one RET for the 8T8R Beamforming array.

The CCI Hybrid Multiband Beamforming Antenna, will allow operators to reduce OPEX and CAPEX costs, by having a high performing 8T8R array, integrated into eight port 65° multiband array, all within a single antenna enclosure.

CCI antennas are designed and produced to ISO 9001 certification standards for reliability and quality in our state-of-the-art manufacturing facilities.

Applications

- 8T8R Beamforming, supporting 3.3 - 4.2 GHz, with calibration port
- Single 4X4 MIMO Low Band ports and Single 4x4 MIMO for the Mid Band ports
- With CCI's Hybrid Multiband Beamforming Antennas, wireless providers can connect multiple platforms to a single antenna, reducing tower load, lease expense, deployment time and installation costs

AISG Cable

AISGC-M-F-xFT

Electrical Specifications

Individual Cable Part Number	AISGC-M-F-x(FT)
Cable style	UL2464
Protocol	AISG 1.1 and AISG 2.0
Maximum voltage	300 V
Rated current	5 A at 104° F (40° C)

Mechanical Specifications

Individual Cable Part Number	AISGC-M-F-x(FT)
Cables per kit	1
Connectors	2 x 8 pin IEC 60130-9 Straight male/straight female
Tightening torque	Hand tighten only \approx 1.84 ft-lbs (2.5 Nm)
Construction	Shielded (Tinned Copper Braid)
Braid coverage	85%
Jacket Material	Matte Polyurethane (Black)
Conductors	1 twisted pair - 24 AWG 3 conductors - 19 AWG AWM style 2464
Cable Diameter	0.307 in (7.8 mm)
Length	See order details
Minimum bend radius	3.15 in (80 mm)
