DATA SHEET

Tri-Band Omni Antenna

SCA360F-EHJ4Gv2

- 48" (1.2 m) tall x 14.5" (0.36 m) wide, Tri-band, 20 port quasi-omni canister antenna with 360° of coverage, providing Full Spectrum Compliance covering 1695-2690 MHz, 3300-4200 MHz and 5150-5925 MHz
- Twelve wide band ports covering 1695-2690 MHz, four wide band ports covering 3300-4200 MHz and four wide band ports covering 5150-5925 MHz all within in a low weight and low-profile canister antenna
- Antenna meets U-NII pattern and gain requirements set forth by FCC and CRTC
- This canister antenna is designed for multiple operators/platforms, with each pair of ports residing on separate and independent antenna arrays, minimizing potential interference between multiple operators. Pairs of the same frequency band ports can be combined for 4x4 MIMO where applicable
- The antenna is equipped with standardized 6-Bolt "Starburst" attachment
- Exceeds minimum PIM performance requirements
- Equipped with 4.3-10 connectors, which are 40% smaller than 7/16 DIN connectors
- Can be ordered with Brown or Black radomes in addition to default grey color
- This canister antenna is also equipped with various EDT configurations, to allow maximum coverage/performance flexibility. Each set of four ports in 1695-2690 MHz, can be configured with a different EDT setting. Refer to the ordering option section for further details
- Equipped with an internal GPS antenna with Type N connector

Overview

The CCI Tri-band Quasi-Omni Small Cell antenna provides three independent sets of 4x4 Multiple-Input-Multiple-Output (MIMO) functionality across the 1695-2690 MHz ports, one set of 4x4 Multiple-Input-Multiple-Output (MIMO) functionality across the 3300-4200 MHz ports and two independent sets of 2x2 Multiple-Input-Multiple-Output (MIMO) functionality across the U-NII 5150-5925 MHz ports.

CCI antennas are designed and produced to ISO 9001 certification standards for reliability and quality in our state-of-the-art manufacturing facilities.

Applications

- With a 48" height and 14.5" diameter, this low-profile canister antenna is an ideal solution for Small Cell Densification deployments in difficult jurisdictional urban, suburban, rural and other visually sensitive environments
- Outdoor Distributed Antenna Systems (ODAS), neutral host in venues, campuses and other outdoor coverage applications
